Spot the Mistake

1.

```java
public static void main(String[] args) {
    var cx = Context.newBuilder("js");
    cx.eval("js", """

        console.log("can you see me?");
            """);
}
```

2.

```java
static String JS_CODE = "(function myFun(param){console.log('hello '+param);
return 'WOOP'})";

    public static void main(String[] args) {
        try (var context = new Context()) {
            var value = context.eval("javascript", JS_CODE);
            var returnedValue = value.execute("TestValue");
            System.out.println(returnedValue);
        }
    }
```

3.

```java
static String JS_CODE = "(param) => param.toUpperCase();";

    public static void main(String[] args) {
        System.out.println("Hello Java!");
        try (Context context = Context.create()) {
            var value = context.execute("js", JS_CODE);
            var returnedValue = value.eval("TestValue");
            System.out.println(returnedValue);
        }
    }
```
